Prompt Service and Safe Delivery

A Word of Caution

Our country is at War and many products which have been in abundance in the past have become very scarce at this time. Great Britain uses a great deal of seeds of all kinds and the sources of supply in this country are being heavily drawn upon. Therefore, we strongly suggest that you purchase your needs for this coming season at the earliest possible time. Our seed shipments are mostly in. Quality and germination are of the highest. Prices are moderate and you should purchase while this condition exists.

We also recommend very strongly that you purchase your insecticide needs and all other of your farm requirements for the coming year. Prices have not gone up much at this writing and we recommend that you act while merchandise is available and the price moderate. You have nothing to lose and all to gain on this action.

FIELD SEEDS

Montana Grimm — one of the hardiest alfalfas; branching roots system; winter kill resistant; high in germination and purity.

Idaho Grimm — Another hardy alfalfa; same characteristics as Montana Grimm.

Blue Tag Grimm — The choice of all alfalfas; State certification as to origin; branching roots system; winter kill resistant; high in germination and purity.

Montana Common Alfalfa — a high quality alfalfa, adapted for this area; does well and is a good producer.

Idaho Alfalfa — same characteristics as Montana Common.

Sweet Clover — White and Yellow blossom — one of the greatest soil builders; very tall and bushing, producing a great growth; very low in price; high in purity and germination.

Grundy County Sweet Clover — early variety — does not grow so tall, easy to handle; it is finer and leafier.

Medium Red Clover — one of the most useful legume crops in use; ranks next to alfalfa in feeding value. Prices are low this year.

Alsike Clover — Finer and more leafier than Red Clover, producing a heavy crop of hay — good crop for low grounds.

Timothy — Finer quality seed — low in price.

Every available seed that you may need on your farm, you may obtain at any of our warehouses. We suggest that you see our warehouse men for your seed requirements at once and make arrangements for your seed requirements.

SEED GRAINS

Progress Wheat — a high quality rustless bearded wheat; a hardy spring wheat; one of the highest yielders.

Sturgeon Wheat — Resistant to rust, very hardy and a good bread maker.

Oats — different varieties of high quality seed oats, adapted for this district.

Barley — Wisconsin No. 38 — a high yielder and very stiff straw; one of the highest quality barleys — high germination and purity.

We carry all other seed grains — see us for prices.

BUSH BEANS—Green Pod

	lb.	pk.	bu.
BLACK VALENTINE (48 days)	1	15	60
Very hardy. Pods are long and fleshy.	.30	2.75	9.25
STRINGLESS GREEN POD (50 days)30	2.60	8.60
The leading round pod variety.			
BOUNTIFUL STRINGLESS (48 days)30	2.60	8.60
A main crop variety with pods 7 to 8 inches in length.			
Very hardy, early and productive.			

WAX BEANS

	1 lb.	pk.	bu.
PENCIL POD BLACK WAX (52 days)30	15	60
The best of the black seeded wax varieties. Pods 6½ to 7 inches. Stringless and of high quality.	.30	2.60	8.60
ROUND POD KIDNEY WAX (52 days)35	3.65	13.25
Yellow round meaty pod. Stringless. A good canning variety.			
WARDWELL'S KIDNEY WAX (53 days)30	2.80	9.90
A popular early Gardeners variety. Pods large, 5½ to 6 inches long. Nearly stringless and of good quality.			
UNRIVALED WAX (53 days)30	2.80	9.90
Produces pods about 5 inches in length. Narrow, fairly straight fleshy yellow pods. Strings.			
IMPROVED GOLDEN WAX (50 days)35	3.30	11.90
The most popular of the wax varieties and one of the best.			
Very early and productive. Pods 4 to 4½ inches long.			
Seed white, much mottled brown.			

Get **PREMIUM CROPS**

If you wish to get the finest crops you ever had, start with quality seeds. Blue Ribbon Seeds top the market in every respect — they produce the kind of crops that bring in real profit dollars.

Come in and let us tell you more about Blue Ribbon superiority.

BLUE RIBBON SEEDS

This year, because of the wonderful quality of Canadian Alfalfa, we heartily recommend the use of Canadian Grimm. Blue Ribbon Canadian Grimm is grown in Saskatchewan, where the climate is most hardy and no Sweet Clover is permitted to be produced. Also, the origin of the Grimm in this district is mostly Idaho or Montana Certified seed. Because of its quality, we recommenr this year the use of

Blue Ribbon Canadian Grimm Alfalfa

LAKE-COOK FARM SUPPLY CO.

Distributors for ALLIED SEED COMPANY, Inc.

BUSH LIMA BEANS

	1 lb.	pk. 15	bu. 60
HENDERSON BUSH LIMA (65 days)30	2.65	9.25
A hardy, very early and small type of lima. Much in favor with canners. Pods small and about 3 inches long.			
FORDHOOK BUSH LIMA (78 days)35	3.30	11.90
Produces a large strong plant growing upright, keeping the pods off of the ground which prevents rot. Pods 4 to 4½ inches, long, containing 3 to 4 beans. Season 75 days.			
BURPEE'S IMPROVED LIMA (76 days)30	2.80	9.90
Both beans and pods larger than old type; average one bean more to the pod; beans larger and thicker than in old form.			

POLE BEANS—Green Pod

	1 lb.	pk. 15	bu. 60
KENTUCKY WONDER OR OLD HOMESTEAD30	2.80	9.90
Pods are fleshy and green (7 to 10 inches), stringless when young.			

BEETS

	1 lb.	5 lb.	10 lb.
CROSBY'S EGYPTIAN (50 days)	2.20	10.75	21.00
Roots a flattened globe shape, skin dark red, flesh a trifle lighter in color and lightly zoned. Tops small.			
DETROIT DARK RED (53 days)	2.20	10.75	21.00
An early variety. Root globe shaped, slightly tapering. Smooth skin, mahogany red flesh, crisp and sweet. One of the best varieties to store for winter.			

MANGEL

	1 lb.	5 lb.	10 lb.
MAMMOTH LONG RED	1.40	6.60	12.65
The skin is bright red, and the flesh white, with veined rings of rose-pink. Enormously productive.			
GOLDEN TANKARD	1.40	6.60	12.65
Yields enormous crops, very rich in sugar. Skin and flesh deep orange yellow.			

CABBAGE

	oz. .45	¼ lb. 1.50	lb. 4.40
COPENHAGEN MARKET (early) (68 days)45	1.50	4.40
Head is Medium in size, round, solid, uniform in shape and maturity, very good quality, (heads average 3½ to 5 pounds).			
ALL SEASONS (yellow resistant) (98 days)45	1.65	4.50
Withstands dry weather. Especially good for kraut.			
MARION MARKET (75 days)55	2.10	5.60
An excellent copenhagen market type but a little later.			
EARLY ALL HEAD YELLOWS RESISTANT (70 days)50	1.75	4.50
Very large flat heads and fairly solid, usually range from 6½ to 7½ lbs. in weight.			
WISCONSIN NO. 8 (yellow resistant) (100 days)45	2.25	4.50
This variety is especially good for storage and tonnage trade. Produces a heavy round head.			
BUGNER'S (100 days)70	2.20	6.60
The leading winter variety for this section of the country. A good keeper.			

SAVOY CABBAGE

IMPROVED AMERICAN
Forms a hard head and densely curled leaves.

oz.	¼ lb.	lb.
.45	1.50	4.40

RED CABBAGE

MAMMOTH ROCK RED (very late) (95 days)
Head is Medium in size, globular to slightly flattened, very firm and solid, uniform, attractive deep purple color.

oz.	¼ lb.	lb.
.45	1.50	4.40

RED RESISTANT (100 days)
Not as large as Mammoth Rock Red, but darker and more uniform.

.75	2.40	7.25
-----	------	------

CARROTS

GREATER CHANTENAY (70 days)
This is a Chantenay which resembles the original type in all respects except that it averages 1½ to 2 inches longer.

¼ lb.	lb.	5 lb.
1.50	4.40	21.50

CHANTENAY (60 days)
This is a half long, good medium early variety, with half long stump root, best for early bunching.

1.50	4.40	21.50
------	------	-------

CHANTENAY RED CORE (70 days)
Root is Medium in length (5 to 6 inches, 2½ inches at the shoulder) with square shoulder, tapering slightly, stump-rooted at the bottom, very good quality.

1.55	4.70	22.00
------	------	-------

DANVER'S HALF LONG (80 days)
The best known second early variety. Roots 6 to 8 inches long, tapering to a blunt point; flesh deep orange, tender and good quality.

1.50	4.40	21.50
------	------	-------

**HARDY'S
IODIZED SALT**
is stabilized!

Salt Blocks lose their iodine rapidly unless the iodine is sealed into the salt by the stabilization process.

Hardy salt blocks are iodized for cattle health, and they're stabilized to hold the iodine.

**Insist on STABILIZED Salt Blocks — They
Cost No More!**

Sold by Lake-Cook Farm Supply Co.

CARROTS (Continued)

	¼ lb.	lb.	5 lb.
NANTES HALF LONG (68 days)	2.00	6.00	22.50
Roots 6 to 8 inches long, with blunt ends, smooth and of bright orange color. Flesh red, sweet and mild, almost coreless.			
IMPERATOR	1.65	5.00	22.00
Tops medium but strong enough for good bunching. Roots 7 to 8 inches long, have sloping shoulders, are smooth, deep rich orange; tapered to a semi-blunt end. Flesh rich orange color, extending to center of root with indistinct core; fine grained, tender and of fine quality. An excellent variety for market garden and shipping.			

CAULIFLOWER

	oz.
CHICAGO SNOWBALL	3.30
For early outdoor planting and forcing, as well as for late sowing for the fall crop this variety is standard. A well grown head measures 9 to 10 inches across with depth in proportion, and a perfectly white core.	
DRY WEATHER	4.40
This sort is grown to provide, as far as possible, against hot, dry-weather contingencies of crop failure. It is a very sure header, heads larger than Snowball, and is snow-white, second early.	

CELERY

	oz.	¼ lb.
CELERIAC, LARGE SMOOTH PRAGUE (120 days)65	1.70
Excels in quality, size and appearance. A main crop variety, nearly globe-shape and almost twice the size of Erfurt		

HYBRID SWEET CORN

	1 lb.	1 pk.	1 bu.
GOLDEN CROSS BANTAM (84 days)50	12½	50
A bright yellow 12 rowed corn with 8 in ears borne well up on a sturdy stalk. Fully equal in quality to Golden Bantam, maturing about 6 days later and 2 to 3 times as productive. Very resistant to Stewarts Disease.			
HYBRID BANTAM EVERGREEN (80 days)50	5.00	19.00
Stalk 6 to 7 ft. Ear 9-9½ in. 14-rowed with deep rich yellow kernels, tender sweet and well flavored. Earlier, more productive, more uniform and far better in every way than open pollinated Bantam Evergreen.			
HYBRID GOLDEN HUMMER (60 days)45	3.80	14.00
Earliest of the hybrids. Like the open pollinated, but more productive, more uniform and has a higher sugar content.			
TENDER GOLD (72 days)45	3.90	14.25
A very fine corn of outstanding quality introduced after years of research. Four days earlier than Golden Bantam and generally. Twice as productive, the attractive 8 in. 12-rowed ears commanding a premium on the market.

SWEET CORN

	lb.	pk.	bu.
	1	12½	50
GOLDEN BANTAM (78 days)30	2.20	7.75
Plant: Small (4 to 5 feet) suckers freely.			
Ears: Small, short to medium in length (5 to 7 inches), slender with 12 rows.			
Kernels: Very broad, shallow, creamy yellow color, excellent quality.			
WONDER BANTAM BARDEN'S (74 days)30	2.20	7.75
This is a cross of Golden Bantam and Early Wonder, an 8-rowed sweet corn and has the sweetness and the color of the old reliable Golden Bantam and all the toothsome qualities of looks and taste but with this welcome improvement that the ears are larger, 8 to 10 inches long and set up higher on a more sturdy stalk, the stalk being from 5 to 6 feet. Ready for the market in 76 days.			
GOLDEN GEM30	2.30	8.25
An early variety of yellow corn that has a stalk about the size of Golden Bantam, and ears somewhat larger. In this section from 5 to 7 days earlier than Golden Bantam, very good quality.			
BANTAM EVERGREEN (75 days)30	2.30	8.25
A variety of Golden Bantam crossed with Stowel's Evergreen, a yellow corn of good quality which meets with a great deal of favor in the Chicago area.			
WHIPPLE'S EARLY YELLOW (Early to second early) (81 days)30	2.20	7.75
Fair sized plant (5 to 6 feet).			
Ears: Medium in size (usually 7 to 8 inches), thick, slightly tapering with from 12 to 16 rows.			
Kernels: Medium width, deep, of yellow color, of good quality.			
COUNTRY GENTLEMAN (Shoe-peg corn) late (90 days)30	2.50	8.75
Plant: Large (usually from 6½ to 7½ feet high), suckers moderately, silk is very heavy and of red color.			
Ears: Large in size, medium in length (from 7 to 8 inches), medium in thickness, tapering with bulge at middle, without row formation.			
Kernels: Irregular on cob, very narrow, very deep and slender, closely set, of white color, good quality, but must be picked promptly when ready.			
STOWEL'S EVERGREEN (94 days)30	2.50	8.75
Plant: Large size (usually from 7 to 8 feet high), with few to no suckers.			
Ears: Large in size, medium in length (from 7 to 9 inches), thick, slightly tapering, with from 14 to 20 rows.			
Kernels: Narrow to medium in width, closely set, fairly deep of white color, of good quality.			
GOLDEN GIANT (Week later than Golden Bantam) (82 days)30	2.20	7.75
Plant: Medium size.			
Ears: Large in size, 18 inches long with 16-18 rows of creamy yellow kernels set fairly deep.			
GOLDEN HUMMER (60 days)30	2.30	8.25
The largest and earliest of the Yellow Sweet Corns and one of the best for market gardeners as well as home gardeners. Ears 6½ to 7 inches, 12-rowed, kernel golden yellow, medium deep, broad and of excellent flavor.			
EARLY EVERGREEN (83 days)30	2.30	8.25
Earlier than Stowel's Evergreen by 8 to 10 days. This variety remains green for a long time. Large ears.

KING OF ALL HYBRIDS

- Let's do a little plain thinking. Iowa State College has shown in recent tests that it takes 15% more corn to make 100 pounds of beef with flinty corn than with soft starch corn. And it takes 20% longer to get that gain with flinty corn than it does with the soft starch type.
- Can you afford to feed 15% more corn to your stock? Do you like to keep your stock in the feed lot longer than you have to?
- You don't have to sacrifice feeding value when you plant hybrid corn. Keep away from flinty hybrids. Plant Iowea hybrid corn — it has been bred for soft starch kernels.

CUCUMBERS

	$\frac{1}{4}$ lb.	1 lb.	5 lb.
DAVIS PERFECT (65 days)60	1.80	8.75
Plant: Fairly productive, vigorous in growth.			
Fruit: Long (8 to 10 inches) medium in thickness, tapering towards both ends making fruit spindle-shaped, of dark green color, with few very small warts and white spines, smooth, very small seed cavity, firm, fair quality.			
THE VAUGHAN (72 days)75	2.25	10.50
Darker in color than the white spine varieties, uniform in size and shape, very good variety for outside cukes.			
IMPROVED WHITE SPINE (62 days)60	1.80	8.75
Plant: Very productive, moderately vigorous in growth.			
Fruit: Short (averaging from 6 to 7 inches long at table stage), thick, round ended with but little taper, of light green color with white spines running about a third of the length from blossom end towards stem end, with few very small warts and white spines, large seed cavity, firm, fairly crisp, of good quality.			
IMPROVED LONG GREEN (Late) (68 days)75	2.25	10.50
Plant: Productive, very vigorous in growth.			
Fruit: Very long (from 10 to 12 inches), medium in thickness, straight, slightly tapering towards the stem end, of medium to dark yellowish green color, with faint stripes, very large prominent warts making a rough surface, black spines, uniformly distributed, small seed cavity. (This is the variety that is widely grown in the Chicago area for yellow cukes.)			
CHICAGO WESTERFIELD PICKLE (Early) (58 days)60	1.80	8.75
Plant: Productive, but lacks vigor in growth.			
Fruit: Short, slender, slightly tapering, medium green color, with black spines and many large prominent warts.			
QUICK GROW (48 days)60	1.80	8.75
A pickle similar to "Chicago Westerfield" in size and shape, but some earlier. Used a great deal in the Chicago area.			
SNOW'S FANCY PICKLING (56 days)60	1.80	8.75
A selection of the "Chicago Pickle" shorter when ripe than "Chicago Pickle", broad at stem and tapering at tip.			
GREEN PROLIFIC or BOSTON PICKLING (58 days)60	1.80	8.75
Smooth, symmetrical pickle, very early and productive.			

DILL

DILL55	1.65	7.75

EGG PLANT

BLACK BEAUTY (90 days)	oz.	$\frac{1}{4}$ lb.	1 lb.
	.45	1.25	

Early and nearly as large as New York purple. Fruit dark purple. Holds its color for a long time.

IMPROVED N. Y. PURPLE (93 days)45	1.25	
--	-----	------	--

The favorite variety, spineless. Plant large and producing four to six large oval fruits of dark purple color.

KALE OR BORECOLE

DWARF GREEN CURLED (55 days)	oz.	$\frac{1}{4}$ lb.	1 lb.
	.30	.75	2.20

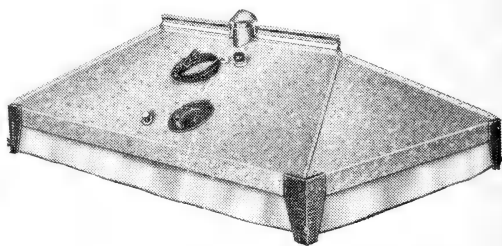

Very hardy variety, about 1 to 1½ feet high, spreading growth, finely curled, long leaves. Can be used as a vegetable or for garnishing.

SELF - FEEDERS

Self-feeders will satisfactorily dispense all kinds of grains, ground feed and supplements automatically. Every partition section has an individual regulator adjustable from the outside whether hopper is full or empty. Partitions extend down into the trough so that feed does not become mixed. Feeder doors are wide enough for the largest hogs and light enough for small ones.

ELECTRIC BROODERS

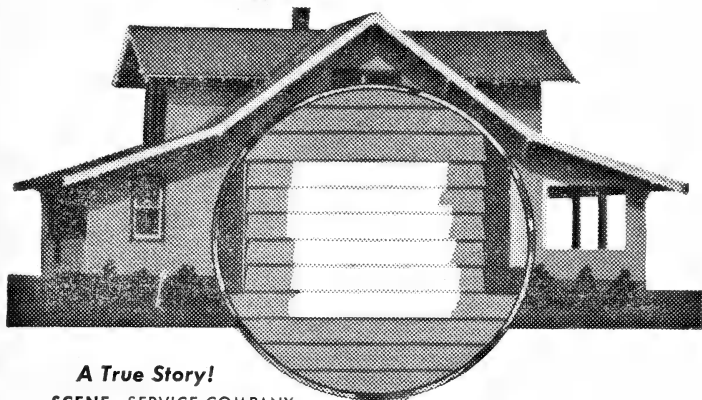

The Hudson Electric Brooder serves the poultrymen efficiently by keeping the litter dry and the chicks healthy. It has the following points:

1. Even distribution of radiant heat.
2. Ample reserve for colder weather.
3. Ventilation and humidity controlled.
4. Adjustable legs.
5. Inspection door.
6. Fully-insulated.
7. Rugged construction.
8. Easy to operate.

KOHLRABI

	oz.	¼ lb.	lb.
EARLY WHITE VIENNA (60 days)55	1.80	5.50
An early sort that grows rapidly. The foliage is small and the bulbs round and white, with fine-grained white flesh that is remarkably tender.			
EARLY PURPLE VIENNA (60 days)45	1.50	4.50
Similar to Early White Vienna except a bluish purple in color.			

LEEK

LARGE MUSSELBURG	1.15	3.75	11.00
The large variety, often three inches in diameter and becoming very white and tender.			

LETTUCE

VAUGHAN'S ALL SEASON (80 days)20	.60	1.80
Heads large, solid, leaves grayish green, never spotted or brown—broad and thick. This variety is slow to run to seed.			
BLACK SEEDED SIMPSON (46 days)20	.40	1.10
Forms large, loose, yellowish-green leaves, crumpled and frilled. Exceedingly tender and crisp. Very popular home garden variety as it is very early.			

LETTUCE (Cabbage or Head Varieties)

PRIZEHEAD (Early) (45 days)20	.40	1.20
Desirable variety for the home-garden as it is decidedly crisp and of good flavor, forming large heads of blistered, crumpled leaves.			

MUSKMELON

	oz.	¼ lb.	lb.
IMPROVED MILWAUKEE MARKET (87 days)25	.90	2.65
Plant: Vigorous in growth, somewhat susceptible to disease. Fruit: Medium in size (4½ to 5½ pounds), nearly round, light green color, lightly ribbed, firm, holds up well. Flesh: Of deep salmon color, thick, soft, juicy, fibrous, very sweet, extremely high quality.			
HONEY ROCK or SUGAR ROCK (85 days)25	.60	1.75
Plant: Vigorous in growth. Fruit: Medium sized, not ribbed, oval in shape. Flesh: Orange colored and thick. Sweet with a distinctive flavor.			
HEARTS OF GOLD or IMPROVED HOODOO (90 days)25	.60	1.75
Plant: Vigorous, resistant to blight or rust, hardy. Fruit: Small to medium in size (2 to 3 pounds), round, green color. Flesh: Deep orange color, very thick, firm and sweet.			
YELLOW OSAGE (92 days)25	.60	1.75
HONEY DEW (110 days)30	.60	1.75
Plant: Fairly vigorous in growth. FRUIT: Slightly oval, 6 to 8 inches in diameter, and weighs 6 to 8 pounds; the skin is smooth and when ripe is creamy yellow in color. Flesh: Light emerald green, fine grain and a very sweet, sugary flavor.			
BENDER'S SURPRISE (Early to second early) (90 days)30	.60	1.75
Plant: Fairly vigorous in growth, resistant to diseases. Fruit: Large (6 to 8 lbs.) though many will weigh from 8 to 10 lbs., nearly round, light grayish green color, slightly ribbed, coarse netting, large scar at blossom end, very firm, holds up very well. Flesh: Deep orange color, very thick, firm, little fibre, sweet, of high quality.			

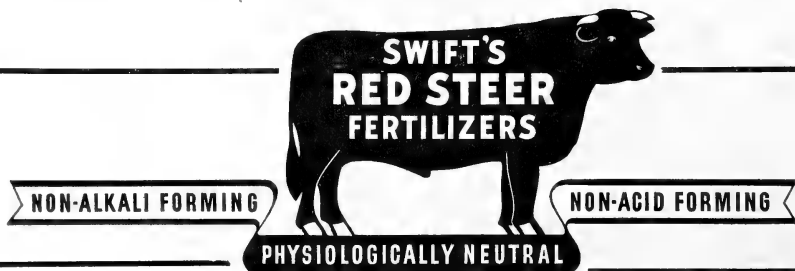

OF COURSE YOU WILL FERTILIZE!

It's not a question of whether or not you will fertilize your next crop, it's a question of what grade fertilizer, how much and what kind! You'll find our "practical experience" advice just the help you need.

We are recommending Physiologically Neutral Fertilizer again this year because extra quality and the extra yield it produces is not only a source of added profits for you, it's a **national need**.

Swift's Red Steer Fertilizers are Physiologically Neutral . . . both Non-Acid Forming and Non-Alkalie Forming. They supply added Calcium, Magnesium and other extra elements. Our recommendations are based on the results these fertilizers have produced right in this vicinity.

Come in and discuss your fertilizer problems early. We want to be ready to supply you when you start to plant.

SOLD BY
Lake-Cook Farm Supply Co.

MUSKMELON (Continued)

	oz.	¼ lb.	lb.
ROCKYFORD SELECT (Second early) (96 days)25	.50	1.60
Plant: Lacks vigor.			
Fruit: Small to medium (1 to 2 lbs.), round to somewhat oblong, slightly ribbed, firm, holds up very well.			
Flesh: Of green color with very faint lining of pink, thick, firm, very little fibre, very sweet, of high flavor.			
HALE'S BEST (83 days)25	.50	1.60
Plant: Fairly vigorous.			
Fruit: Oval in shape, about 8 by 4½ inches, with heavy netting and fairly prominent ribs.			
Flesh: Salmon color and of exceptional thickness.			

WATERMELON

	oz.	¼ lb.	lb.
TOM WATSON (92 days)15	.30	.80
One of the best shipping melons. The fruits measure 18 to 24 inches long and 10 to 14 inches in diameter, weighing 50 to 60 pounds each. The delicious deep red flesh extends close to the rind, which is dark green and very strong.			
NEW WONDER (87 days)15	.30	.80
Similar to Kleckley's in shape, but larger and has harder rind.			
STONE MOUNTAIN (88 days)15	.30	.80
A very large, medium dark green, round melon of excellent quality. Flesh highly colored, very solid with fewer seeds than most watermelons. Has gained a well deserved popularity in the South where the fruits frequently attain a weight of 60 to 80 pounds. The rind is tough enough to stand handling for nearby markets but will not stand long distance shipping. Edible in 88 days.			
KLECKLEY SWEET (88 days)15	.30	.80
One of the best melons for home use or near-by markets. The rind is unusually thin, and the beautiful bright scarlet flesh ripens close up to it. It is oblong in form and has glossy dark green skin. The flesh is crisp and sugary, without a sign of stringiness. The melons average 18 to 20 in. in length by 10 to 12 in. in diameter.			
SWEETHEART (88 days)15	.30	.80
A good shipping melon and very popular in the markets. The fruits are large, heavy, of oval to round form, with very pale green skin distinctly mottled with a darker shade. Flesh solid, deep red.			

MUSTARD

	¼ lb.	1 lb.
GIANT SOUTHERN CURLED35	1.00
A vigorous-growing hardy variety, forming a large mass of curled and ruffled leaves.		

ONIONS

	1 lb.	5 lb.
SOUTHPORT YELLOW GLOBE (Eastern grown) (110 days)	5.50	26.00
Bulb: Large sized, deep globe-shaped, slightly tapering, small neck, cures well, of bright yellow color, good keeper, of excellent quality		
SWEET SPANISH (Riverside) (110 days)	9.75	43.00
Grows larger than the American Prizetaker, and does not produce the "stiffnecks" as is usual in the Spanish type.		
YELLOW GLOBE DANVERS (Early to second early) (110 days)	5.50	26.00
Bulb: Medium to large-sized, slightly flattened, globe-shaped, slender neck, cures well, of yellow color, very good keeper of good quality.

ONIONS (Continued)

	1 lb.	5 lb
RIVERSIDE WHITE SPANISH (110 days)		
Largest of the Spanish type. It is unequaled for the production of tender, mild green onions for table use, and if grown to maturity produces a large white bulb of remarkable keeping qualities.		
WHITE BUNCHING		
A European onion for early spring and summer bunching.	10 lb.	100 lb.
JAPANESE or EBENEZER (100 days)	45.00	425.00
Used mostly for growing sets, and one of the best keeping onions on the market. Does not run to seed readily. Bulbs 2 to 3 inches, deep flat in shape, deep yellow, very firm with thick skin.		
WHITE PORTUGAL (95 days)	60.00	575.00
This is the best sort to sow for onion sets or for pickling. When sown thickly for either it makes a small, round, hard bulb.		
AUSTRALIAN BROWN	40.00	375.00
Bulbs 2 to 3 inches, clear amber brown, deep, flat with white flesh, flavored very strong.		

PARSLEY

	¼ lb.	lb.
CHAMPION MOSS CURLED (Early)45	1.40
Plant: Small upright, compact, vigorous in growth.		
Leaves: Large, very finely cut, closely curled, strong stem, very dark green.		
HAMBURG ROOTED (Late).....	.45	1.40
Plant: Large, upright, slightly spreading, vigorous in growth.		
Leaves: Large in size, deeply cut, flat, not curled, strong stem, dark green.		
Root: Small in size, short, thick, round, of white color.		

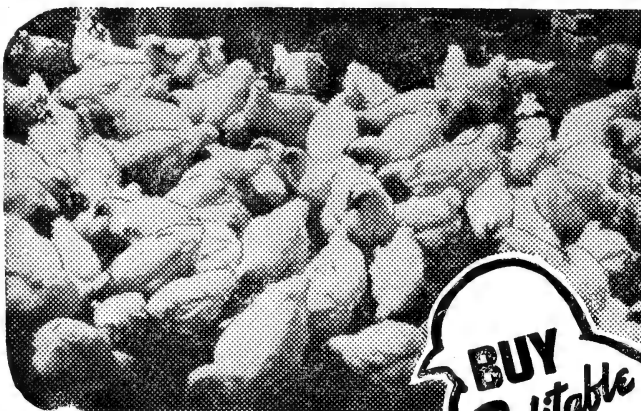

PARSNIPS

	¼ lb.	lb.
HOLLOW CROWN55	1.65
Root: Long, white, smooth, tender, sugary and of the most excellent flavor. Very hardy and will keep through the winter without protection.		
IMPROVED GUERNSEY (Second early)55	1.65
Root: Large sized, very long (8 to 15 inches), fleshy, about 2½ to 3 inches in diameter at top, skin smooth, of white color, good quality, tender, and sweet.		
WHITE QUEEN60	1.75

PEAS

	1 lb.	pk.	bu.
ALASKA (Very early) (57 days)40	2.50	8.75
Plant: Half dwarf in growth (2 to 2½ feet), slender vines, fine foliage, very light green color. Small pods.			
LAXATONIAN (62 days)40	3.00	10.00
Plant: Small (15 to 18 inches), heavy vine and foliage, of dark green color.			
Pods: Large to very large in size (3½ to 4 inches), broad, curving slightly, dark green color (6 to 8 peas in each pod), peas large, light green color, very good quality.			
NOTT'S EXCELSIOR (58 days)40	2.75	9.75
Plant: About 15 inches high, vigorous and very prolific. good size, tender and delicious.			
AMERICAN WONDER (Extra Early) (60 days)40	2.75	9.75
Plant: Dwarf vines 10 to 12 inches high.			
SUGAR OR EDIBLE POD (72 days).....	.40	3.00	10.00
Large edible pods 4 to 4½ inches in length and 1½ inches broad. Vine grows to a height of 48 inches.			
PREMIUM GEM (Extra Early) (58 days)40	2.75	9.75
Pods: Firm and well filled, 3 inches long, wrinkled.

SPINACH

	lb.	10 lbs.	100 lbs.
KING OF DENMARK (Antvorskov) (Second early) (44 days) Plant: Large size, spreading in growth, stands longer without shooting to seed than any other variety. Leaves: Large in size, rounded, usually smooth, moderately thick, dark green color, very long petioles.			
OLD DOMINION (40 days) The same as Virginia Blight-Resistant in type and quality. Will eventually take the place of Virginia because of its long standing qualities which permits early spring planting.			
VICTORIA (Late) (50 days) Plant: Small sized, compact, low, spreading, forming a flat rosette close to the ground, quite hardy, stands hot weather fairly well, shoots to seed rather slowly. Leaves: Small in size, usually blunt or rounded at ends, much wrinkled, crumpled and savoyed, especially at base, very thick, dark green color very short petioles.			
NEW LONG STANDING BLOOMSDALE (45 days) Darker green and more heavily crumpled than Bloomsdale, and will stand ten days longer before bolting to seed.			ASK
TRIUMPH (40 days) Withstands hot weather longer than other sorts. Its habit of growing is prostrate instead of upright.			FOR
VIRGINIA SAVOY BLIGHT RESISTANT (39 days) Is a cross of Bloomsdale, resists the mosaic, blight, or "yellows," is vigorous and of fine type, goes to seed quickly when grown in spring, more suitable for fall planting.			PRICES
GIANT THICK LEAVED (Second early) (42 days) Plant: Largest spinach under cultivation, grows rapidly. Leaves: Medium green, large and rounded, slightly crumpled, succulent and tender.			
NEW ZEALAND SPINACH (60 days) Furnishes delightful greens all summer and up to cold weather.			

SWISS CHARD

	oz.	¼ lb.	lb.
SILVER (55 days) This robust growing variety is often referred to as the Spinach Beet, but is grown for its leaf, not for its root.	.20	.50	1.40
CUT AND COME AGAIN (45 days) This vegetable yields a constant crop from July until winter.	.20	.50	1.40
LUCULLUS (55 days) A new moss curled sort. Very large leaves. The mid ribs are very broad and form a good substitute for asparagus in the summer months.	.20	.50	1.40

SQUASH

	oz.	¼ lb.	lb.
BLUE HUBBARD (110 days) Similar to Green Hubbard, but bluish gray in color, better quality, better keeper.	.25	.50	1.35
CHICAGO WARTED HUBBARD (100 days) Fruit: Large, squash slightly oblong, surface rough, covered with warts, dark green color, shell thick, rind hard, good keeper.	.20	.50	1.40
TABLE QUEEN "DES MOINES" ACORN (Early winter) (55 days) Fruit: (5 to 6 inches long), (4 to 4½ inches in diameter), dark green color, deeply ribbed, smooth skin. Flesh: Moderately thick, light orange color, good quality.	.20	.45	1.15
YELLOW SUMMER CROOKNECK (56 days) Fruit: Large, (15 to 20 inches long) warted, of rich yellow color, crooked neck, good quality.	.15	.40	.90
GIANT STRAIGHTNECK (55 days) A selection of the crookneck except having a straight neck.	.20	.40	1.00

YOUR COMBINE OR CORNPICKER NEEDS LUCO LUBE IN 100 OR MORE FITTINGS

Luco Lube is a clear, pure lubricant. It has the ability to withstand shocks and jolts and "clings" where ordinary greases "fly out." Luco is a safe lubricant because of its high quality, great stability, and resistance to heat and water. Luco "stays put."

A WORD ABOUT PRICES—Blue Seal salesmen are now booking 703 CARLOADS of Blue Seal Lubricants to insure adequate supplies at present prices. Prices may advance soon. Steel cans and pasteboard cartons are getting scarcer. You'll be acting wisely if you place your order today!

SQUASH (Continued)

	oz.	¼ lb.	lb.
ITALIAN MARROW (Early summer) (60 days)25	.50	1.20
Fruit: Medium in size, cylindrical, dark green, striped with light green, good quality.			
EARLY WHITE BUSH (55 days)15	.40	1.00
A flat, scallop shaped, white squash which should be used while young.			

TOMATOES

	oz.	¼ lb.	lb.
BEAUTY (Mid-season pink) (84 days)30	1.00	3.50
Fruit: Large, uniform, smooth, purplish pink skin, flesh light pink.			
BONNY BEST (Second early) (75 days)30	.90	2.50
Fruit: Small to medium in size, red color, globular in shape, very smooth, very good quality.			
MARGLOBE (Mid-season red globe, blight and nailhead resistant) (80 days)30	.90	2.50
A little later than "Bonnie Best."			
Fruit: Medium to large in size, red color, smooth, solid, thick walls, very good quality.			
EARLY BALTIMORE50	1.50	4.50
Illinois University selection of Marglobe, thriving on all soils, smaller fruit, solid, bright color, heavier yielder.			
JOHN BAER (Mid-season potato-leaved red) (73 days)30	.90	2.50
Fruit: Early red to scarlet type, not as early as Earliana, yield heavier, and more uniform fruit.			
EARLIANA SELECT (Earliest red) (65 days)30	.90	2.50
Fruit: Medium size, red, flattened to nearly round in shape.			
CHALK'S JEWEL (An early red) (76 days)30	.90	2.50
Fruit: Small to medium in size, dark red, nearly globular in shape, slightly flattened, very smooth, small shallow stem cavity, good quality.			
EARLY DETROIT (Early pink) (82 days)30	1.00	3.50
Fruit: Round and nearly globe shaped, firm and purplish pink in color.			
BREAK O'DAY (71 days)30	.90	2.50
A wilt resistant tomato that is nearly as early as Earliana and as productive as Marglobe. Its fruits are large, smooth, red and globular.			
LIVINGSTON GLOBE (82 days)40	1.25	4.00
A large, smooth, purple-fruited variety of good quality.			
GREATER BALTIMORE (83 days)30	.90	2.50
An excellent main crop variety, producing large, solid, smooth fruit of a brilliant red color.			
RED PLUM (73 days)50	1.60
Fruit is bright red and plum shaped.			
YELLOW PLUM (75 days)50	1.60
Fruit is deep yellow and plum shaped.			
GROUND CHERRY (85 days)50	1.60
The small fruit is enclosed in a husk. It is very sweet; prized for eating, preserving and making pies.			
PRITCHARD (76 days)30	1.00	3.50
Wilt resistant. Fruits large, smooth, globular, solid with thick walls and cross sections. Color, deep scarlet.			

TURNIP

	¼ lb.	lb.	5 lb.
PURPLE TOP WHITE GLOBE (Mid-season) (55 days)30	.50	2.25
Plant: Large.			
Leaves: Broad, little divided.			
Root: Large, 3 inches in diameter, globe-shaped, white color with purple or red top, which grows above ground.			
Flesh: White, sweet, very good quality.

PYROCIDE DUST

Pyrocide dust is a non-poisonous dust and through tests run here in this county, it has proven to be very effective for controlling of potato leaf hoppers, beetles, and cucumber hoppers, and we recommend this dust very highly. Due to our unusually large volume in these dusts, we are in position to furnish them at very low prices and with the vegetable market selling at much higher prices than previous years, we heartily recommend that you control the insects. Profits are only made on quality crops that are marketed and not on what the insects eat. We suggest that you give thought to your requirements today and let us know what you will need.

ROTONNE DUST

Rotonne dust is a non-poisonous dust used for the control of sucking and chewing insects. It has been found to be very effective and is low in price. This is kept in stock at all times.

INSECTICIDES

A COMPLETE LINE OF COMMERCIAL INSECTICIDES

Arsenate of lead	Derrisol	Nico Fume

Corrosive Sublimate	Liquid Soap Spreader	Solocide, Semesan
Cyanogas	Lime Sulphur	Tobacco Dust

GUARANTEE—The Lake-Cook Farm Supply Company gives no warranty, express or implied, as to description, quality, productiveness or any other matter of the seeds, it sells, and will not be responsible for the crop. We exercise, however, the greatest care to fill your orders with the highest quality possible, as it is our aim to give our customers fullest satisfaction.

Prices as listed are of the time that this catalog goes to press. We reserve the right to change them at any future date should the market make it advisable that we do so. We are prepared at all times to meet legitimate competition on garden seed prices.

CORRECT FEEDING

—begins with the sow

If the sow has the proper food, the pigs will find plenty of milk.

Blue Seal Pig Meal is a completely balanced ration for pregnant or nursing sows and small pigs up to weaning time. Here is a rich source of proteins, minerals, and vitamins to produce large litters of healthy pigs—plenty of mothers' milk—and gives pigs a good start to become profitable porkers. After weaning time we recommend Blue Seal Hog Balancer as an ideal Supplement for corn.

Have you entered the Blue Seal Chick Starter Livability Contest yet? Ask your Salesman about it!
